EXPERIENCE

Incoming Technology Services Group Co-op | Verisk | Boston, MA January 2027 – June 2027
- Selected after an eight-person panel interview for one of two spring co-op openings on the Technology Services team
- Will support insurance clients running AIR's catastrophe-modeling software, installing, upgrading, and troubleshooting it
- Will partner with software QA to find and resolve issues, write test plans, and build virtual machine libraries of AIR products

Junior Technology Consultant | Family Business Consulting Club | Boston, MA September 2026 – Present
- Selected through case interviews for a newly created technical role at a 30-member student consultancy
- Support consulting teams of 8 to 15 on data workstreams for clients in specialty finance, adtech, and consumer software
- Own the club's client-facing website, auditing it and ranking six fixes by priority in a remediation plan

Webmaster | INFORMS at Northeastern | Boston, MA October 2026 – Present
- Selected to the officer board of an award-winning student chapter of INFORMS, the largest operations research society
- Plan chapter seminars, member meetings, and social events alongside graduate officers and faculty
- Own the chapter's website and its move to a custom domain, showcasing its events and leadership to members

Project Lead | DATA Club @ Northeastern University | Boston, MA January 2026 – April 2026
- Studied whether the way NFL teams split salary cap dollars across position groups shows up in on-field results
- Led the four-person team from research question to final dashboard, setting the timeline and dividing the work
- Merged ten seasons (2013 to 2022) of cap and results data, then built the scikit-learn model and Plotly dashboard

Product Engineering Intern | Peak Innovations LLC | Remote September 2024 – December 2024
- Led CAD development for a redesigned lacrosse helmet prototype over an eight-week, four-person consulting engagement
- Conducted product and competitor research and design reviews, presenting recommendations to the founder

PROJECTS

IG Wrapped | Developer | Next.js, TypeScript, Recharts, Supabase, LLM APIs June 2026 – Present
- Shipped a privacy-first Instagram analyzer that parses export archives up to 512 MB entirely in the browser
- Added an LLM analyst chat that answers questions from aggregated metrics only, plus heatmaps and activity timelines

Smart Health Monitoring System Rollout Plan | Project Management Capstone | Microsoft Project May 2026 – June 2026
- Planned a 195-day, 55-task rollout across a healthcare network with a project team, from WBS to Gantt schedule
- Mapped stakeholders on a power-interest matrix, ranked ten implementation risks, and planned deployment and training

Banking Fraud & Corporate Misconduct | DS 2500 Capstone | Python, Pandas, REST APIs January 2026 – April 2026
- Owned ingestion and cleaning for a four-person team, pulling about 35,000 complaints from the CFPB API into Pandas tables
- Charted complaint trends around enforcement actions at Wells Fargo and TD Bank, keeping conclusions descriptive
