Co-op Availability: January 2027 – June 2027

EDUCATION

Northeastern University, Boston, MA

Expected May 2029

Candidate for Bachelor of Science | Major: Data Science and Business Administration

GPA: 3.83/4.0

Concentrations: International Business and Supply Chain Management

Honors: John Martinson Honors Program, Dean's List

Relevant Coursework: Introduction to Databases (CS 3200), Advanced Programming with Data (DS 3500), Mathematical Foundations of AI (DS 3000), Business Statistics (MGSC 2301), Financial Management (FINA 2201)

Activities: DATA Club, AI Northeastern, NU Votes Ambassador, NU|ACES, Lead360 Blueprint

The American College of Greece, Athens, Greece

May 2026 – June 2026

Summer Study Abroad: Project Management (MG 4057), Management Accounting (AF 3116)

GPA: 4.0/4.0

Capstone: Planned a 195-day, 55-task health monitoring system rollout in Microsoft Project with ten prioritized risks

COMPUTER KNOWLEDGE

Languages: Python, SQL, TypeScript, JavaScript, Java, HTML, CSS

Data & Analytics: Pandas, NumPy, Matplotlib, Recharts, SPSS, Excel, REST APIs, SEC EDGAR, ETL, Data Cleaning, Monte Carlo Simulation, Regression Analysis, Hypothesis Testing, Confidence Intervals, Time-Series Analysis, Generative AI

Engineering: React, Next.js, Tailwind CSS, Supabase, PostgreSQL, Web Workers, Vercel, Prompt Engineering

Testing & Tooling: Git, GitHub Actions, Vitest, Microsoft Project

PROJECT EXPERIENCE

CardEdge | Developer | Next.js, TypeScript, Supabase, Vitest

June 2026 – Present

- Engineered a poker and blackjack decision trainer running Monte Carlo equity simulations in cancelable Web Workers, reporting 95% confidence intervals across three precision modes with caching to skip redundant computation
- Implemented account-backed training history on Supabase Postgres with row-level security isolating user data, enforced by deterministic unit tests and coverage gates running on every push through GitHub Actions

IG Wrapped | Developer | Next.js, TypeScript, JSZip, Recharts, Supabase

June 2026 – Present

- Built a privacy-first export analyzer that unpacks and parses archives entirely in the browser with JSZip, normalizing schemas that vary by region and app version into a unified graph of follows, messages, and interactions, shipping with synthetic demo data
- Scored relationship strength and privacy exposure, rendering day-by-hour heatmaps and monthly timelines in Recharts with optional cloud sync that persists computed insights only and never the underlying export

SEC Football Spending vs. Performance | MGSC 2301 Capstone | SPSS, Regression Analysis

May 2026 – June 2026

- Modeled athletic department spending against final conference standings across 70 SEC program-seasons from 2020 to 2024, building and interpreting a linear regression in SPSS across annual budgets ranging up to \$285M
- Found a statistically significant relationship ($p = 0.013$) explaining only 8.7% of performance variance, reporting R^2 alongside significance to show the data gives weak support for spend-to-win budget strategies across the conference

Banking Fraud & Corporate Misconduct | DS 2500 Capstone | Python, Pandas, REST APIs, Matplotlib

January 2026 – April 2026

- Developed a Python ETL pipeline that pulled roughly 35,000 consumer complaints against seven banks from the CFPB API, handling paginated JSON and flattening nested payloads into analysis-ready Pandas tables
- Benchmarked complaint volume and resolution outcomes at Wells Fargo and TD Bank around major enforcement actions with a four-person team, holding the analysis descriptive after confounding timing effects made causal attribution unsupportable

WORK EXPERIENCE

Junior Technology Consultant | Family Business Consulting Club | Boston, MA

September 2026 – Present

- Recruited into a newly created technical role at a 30-member student-run consultancy that has delivered 13 pro bono engagements since 2023, taking ownership of its public web presence, the primary inbound channel for prospective clients
- Audited the live site and produced a remediation plan ranking six issues by priority, including a server error on a primary page, canonical tag mismatches across every case study, a stale recruitment calendar, and unverified form handling
- Support consulting teams of 8 to 15 across 11-week engagements, covering data and technical workstreams for family-owned clients in specialty finance, advertising technology, and consumer software

Certified Soccer Referee | Massachusetts Youth Soccer | Weymouth, MA

September 2019 – May 2025

- Officiated several hundred matches over seven seasons, usually as the sole official, making real-time decisions under pressure
- De-escalated conflicts among players, coaches, and spectators in recreational, travel, and club matches across all age divisions

Product Engineering Intern | Peak Innovations LLC | Remote

September 2024 – December 2024

- Led CAD development for a redesigned lacrosse helmet prototype over an eight-week, four-person consulting engagement
- Conducted product and competitor research and design reviews, presenting recommendations directly to the company founder

INTERESTS

Languages: Telugu (Native), Spanish, Greek | **Interests:** Sports Analytics, Basketball, Tennis (Four-Year Varsity), Travel
